

The Hill at Bracken Hollow

Numbered dots mark every 30 feet of path. The path is 150 feet long. Reach is measured from the hole, and the line itself counts as inside.

GETTING UP

- **The path:** normal movement, and they can fight as they go. Dashing every round, a carrier reaches the top and seats in round three.
- **Climbing straight up:** an action and an Athletics check, DC 13, for 30 feet of slope. Nothing else that turn.
- **Flying:** allowed. Every wave is a sphere and reaches the air.
- **The crowd** is on the path and the slope. The foot and the air are clear of it.
- **A dasher** ends round one at dot 2, just inside red, and round two at dot 4, just inside white.

REACH OF THE LIGHT, FROM THE HOLE

COLOR	REACHES	PATH INSIDE IT
White	30 feet	the last 30 feet, from dot 4 up
Red	60 feet	the last 90 feet, from dot 2 up
Black	90 feet	all of it

The Stone is Huge, a 15-foot square, and stays by the hole. Its fist reaches 15 feet. Its concussive wave reaches 20 feet, measured from the Stone.
